```cpp
#include <iostream>          0.5 marks
using namespace std;

int main()
{
        double price, commRate, commission;          1 mark
        int quantity;

        cout<<"Enter price of item: ";               1.5 marks
        cin>>price;

        cout<<"Enter quantity sold: ";
        cin>>quantity;

        cout<<"Enter commission rate: ";
        cin>>commRate;

        commission = price * quantity * commRate;    1 mark

        cout<<"The commission is RM" << commission;   1 mark

}
```
